# Reinforced Polymer Mesh Magnetic Door Curtain

Synthetic mesh | Full-length magnetic strips | Hook-on mounting

**Airflow**
**Daylight**
**Insect barrier**
**Wear resistance**

Woven from reinforced polymer composite yarn, the mesh allows airflow and daylight and resists everyday scuffing and abrasion. Separate panels, full-length magnetic strips and bottom weights help the curtain close and reduce insect entry while allowing everyday access. Suitable for restaurants, commercial entrances and balconies.

# Materials and product details

Reinforced composite mesh detail

Hook-on rail and removable plates

| | |
|---|---|
| Mesh material | Synthetic fiber; supplied specification image lists polyester |
| Construction of mesh | Woven reinforced polymer composite yarn |
| Curtain structure | Separate panels, full-length magnetic strips and bottom weights |
| Mounting | Hook-on rail with removable clamping plates for easy storage |
| Key features | Airflow, daylight, insect screening and resistance to everyday scuffing and abrasion |
| Applications | Restaurants, commercial premises and balconies |
| Order configuration | Confirm opening size, finished dimensions, panel count and fittings |

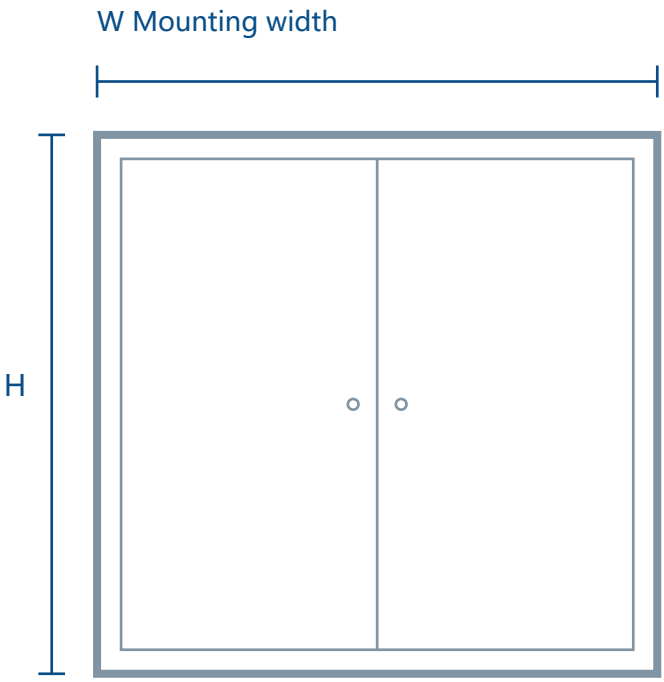

# Everyday use and sizing

## Airflow and daylight with insect screening

The mesh lets air and daylight through. Combined with magnetic closure, it helps reduce insect entry. Align the panels and check the magnetic strips and perimeter fit during installation. Screening performance depends on mesh openings, closure gaps and use.

## Resistance to everyday scuffing and abrasion

The reinforced mesh is designed to withstand light everyday scuffing and rubbing; performance depends on the actual product. Avoid sharp objects and forceful pulling. Hook-on mounting allows removal for cleaning and storage.

### 01 Choose the mounting area

Check the rail mounting surface, frame width and door opening direction.

### 02 Measure width and height

Record W across the full mounting area, including the frame, and H from the top fixing point to the floor.

### 03 Confirm finished size

Send measurements and a photo. Agree allowances, floor clearance, panel count and fittings before ordering.
